

Introducing PinPoint®

breakthrough fiducial markers with a unique conical design to assist in accurate image registration

PinPoint, the perfect fiducial marker for image registration under CT and MRI

PinPoint provides customers with...

ACCURACY

PinPoint's unique conical center helps direct probes to a 1.27mm diameter center hole at the markers base; an area that is 37% smaller than other commonly used fiducial markers.

UNMISTAKABLE IMAGING

Bright and consistent imaging in both CT and MRI ensures that PinPoint will be easily identified on scans.

TIME SAVINGS

PinPoint labels are designed with a Pik-Up™ tab for easy application and removal of the marker; eliminating frustration and wasted time.

PinPoint® for image registration

order code: 128
