Breeza[®]

Flavored Beverage for use with Oral Iodinated Contrast

Breeza offers the ultimate in taste, convenience and patient satisfaction so that you have more time to focus on the truly important things within the CT-Scan department.

Breeza Provides...

GREAT TASTE

- Breeza has been developed specifically to mask the bitter taste of oral iodinated contrast and during testing, patients significantly preferred iodinated contrast mixed with Breeza

PATIENT SATISFACTION

- The appealing look and great taste of Breeza gets patients to drink with less coaxing, complaints, or interruptions
- Satisfied patients are more likely to return to your facility for subsequent exams and to refer others

IMPROVED DOCUMENTATION

- All Breeza bottles have an area where patient and dose information can be documented for easy access and improved compliance

IMPROVED PATIENT CARE

- Breeza reduces rescans and additional radiation dose since more patients are able to consume the prescribed dose the first time
- Breeza limits the number of interpreted exams where little or no oral iodinated contrast was consumed; drinking the prescribed amount ensures the best possible exam and diagnosis
- Reducing the need for NG tubes; Breeza saves time and improves the overall patient experience

TIME SAVINGS

- On average Breeza may save 32 minutes per patient compared to other methods*

CONVENIENCE

- No more messy powders, pitchers, cups, etc. Each bottle of Breeza is under-filled so the oral iodinated contrast can be easily added to the 16 oz. bottle.

✔ Breeza is a tropical fruit flavored beverage and comes in a 16 oz. bottle with 24 bottles per case.

✔ Beekley offers a variety of shipping and pre-arranged inventory programs to suit your facility's needs.
