

R & L SPOTS® DISPOSABLE CASSETTE MARKERS

The Sanitary Alternative to Permanent Markers

Reduce the risk of infection and ensure all films are permanently identified as Right or Left with Beekley Medical's R & L SPOTS® disposable cassette markers — the sanitary alternative to permanent markers.

When used over and over, permanent cassette markers and the tapes used to secure them can harbor and spread opportunistic and pathogenic bacteria including bacilli, streptococcus, and staphylococcus.

Single use, self adhesive R & L SPOTS® disposable cassette markers are the perfect solution for communicating anatomical orientation when imaging immunocompromised and other patients at risk for infection.

R & L SPOTS® are ideal for use on:

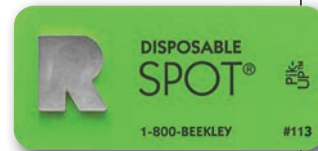

- Neonatal / Newborn Imaging
- Trauma Cases
- Isolation Wards
- Burn Units

R-SPOT®

REF 113 QTY 64 / Box

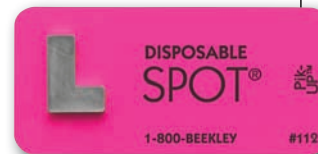

- metallic R for documenting right side on film
- Lead-Free; Latex-Free

L-SPOT®

REF 112 QTY 64 / Box

- metallic L for documenting left side on film
- Lead-Free; Latex-Free

Start using R & L SPOTS® disposable cassette markers as a part of your infection control protocols.
